

he PuroSmart Reverse Osmosis system
uses the most advanced water treatment
technology available. Reverse Osmosis is
recognized as one of the best available technologies
for producing high quality drinking water. It's also the
same method used by many bottled water companies
to make safe and great tasting drinking water.

The PuroSmart Reverse Osmosis system is the only reverse osmosis system that attaches to your faucet and includes carbon block filtration. The carbon block pre-filter removes chlorine, tastes and odors. The reverse osmosis membrane in the PuroSmart removes nearly all the other contaminants common to tap water.

The PuroSmart is the most compact reverse osmosis system available. Unlike other small filter systems that require frequent cartridge changes and only remove taste and odors, the PuroSmart truly purifies

water at the molecular level.

- High Quality, Great Tasting Water
- More Economical
- Slim, Portable, Compact Design
- Easy to Use and Store
- No More Heavy Bottles To Lift

PuroSmart Assembly

The PuroSmart Reverse Osmosis system will produce up to 15 gallons (57 liters) of water per day. It's easy to use; just replace the aerator on your kitchen faucet with the one provided with the PuroSmart. To connect the system press down on the white ring and push the system firmly on the faucet. A clicking sound lets you know the system is attached and ready to use.

Place a clean container in your sink and insert the tubing from the top of the system into your container. Simply turn on your faucet and your PuroSmart system will deliver high quality water for your entire family.

SPECIFICATIONS:

Membrane Production 15 gallons (57 liters) per 24 hour period

Rated membrane life 1 year

Carbon Block Chlorine, Taste and Odor

Rated carbon block life 3 months

Overall Length 8.25 inches (21 cm)

The PuroSmart System is supplied with separate aerator and tubing.

Patent Pending
